Dear

As a local resident I strongly object to any proposal to build new homes on the greenbelt in East Dorset.

Greenbelt is vital to the variety of plants and animals which inhabit them and they also provide recreation for local residents for dog walking, wildlife observation etc...

They protect against urban sprawl and prevent small towns merging into one giant urban conurbation.

Local infrastructure would be quite unable to cope with this many additional homes where roads and services are already stretched to the limit.

All the above go to make up our quality of life and this would be seriously affected by any further urbanisation of this area.

We must not allow this indiscriminate destruction of greenbelt, the reason for whose existence is even more relevant today than 50 years ago when it was introduced. I trust that my objections will be noted, considered and acted upon.

Please do all that is in your power to ensure that no development is allowed on greenbelt now or in the future.

Yours sincerely
